

Crossword Puzzle

NAME _____

CLASS / HOUR _____

Across

- The horticultural elements of a design; plants and grasses.
- An outdoor environment; an area where plants, turf, decks, walks, etc., have been used to create an outdoor living area that makes the area functional and visually pleasing.
- Features in the landscape other than plant materials. Examples include walks, fences, and retaining walls.
- The viewer's eye movement or flow can be directed by the arrangement of plants and their borders.
- The coarseness, or fineness, of a plant created by leaves, branches, bark, or other parts. It can also be created by rough or smooth looking surfaces, thin or thick leaf set, or by darkness or lightness.
- A statement of an estimated price of the landscape project to the client.
- Anyone who hires an individual or company to provide landscape service or a product, such as a homeowner who hires a nursery to landscape his/her property.
- The leading of visual observation toward a feature by strategically positioning that feature.
- A drawing that is designed to show the type and placement of trees, shrubs, flowers, gardens, and pools on the site.

Down

- The relationship between elements in a landscape; can be formal or informal.
- Flowering plants that grow from seed to maturity in one year and then die.
- The relative size of one part of a landscape to another. Scale may be the proportion or ratio of size to other components in the landscape.
- The outline a plant creates as well as the 3-D features it produces: columnar, round, vase, weeping, oval, etc.
- Criteria used in selecting and organizing plant materials and hard-goods and organizing them into the landscape.
- The United States is divided into eleven planting zones ranging from dry to tropical.
- How well the entire design comes together to form one landscape. All aspects of the landscape should complement one another rather than compete for attention.
- When the elements of a design create a feeling of motion that leads the viewer's eye through or even beyond the designed area.
